

Drum Kit

The Chemguard Drum Kit is designed for use with self-educing monitor nozzles. One end is connected to the suction inlet of the self-educing nozzle and the other end placed in a foam concentrate drum. The standard drum kit consists of 10 ft.(3m) of flexible reinforced clear suction hose, PVC foam concentrate shut-off valve, rigid PVC foam concentrate pick-up tube and a vacuum breaker. Standard connection to self-educing nozzle is 1" Female NPT. Other custom hose lengths and connection sizes are available.
