

Preassembled Firefighting Stations

Flexibility and power to fight fires and spills

- Custom adaptability
- Large agent capacity and long discharge time
- Protection of multiple and remote hazard areas
- Effective suppressing and securing capability

CHEMGUARD preassembled fixed foam stations are used to control fires or spills of flammable or combustible liquids. Commonly installed in process, handling and storage areas; foam firefighting stations are available in a bladder-tank style and as self-contained units.

Control fires and spills

The CHEMGUARD Hose Reel Foam Station is a self-contained unit that relies only on water flow and pressure to place the system into operation. It is designed to be installed in a fixed location such as processing, storage or handling areas where it is used to control fires or spills of flammable or combustible liquids. The unit is constructed so one person may operate it to its full potential with the speed and effectiveness necessary in an emergency.

Instant, single-person operation

Continuous-Flow Hose Reel Units are typically installed in areas that require supplemental (foam/water) fire protection. Constructed of galvanized carbon steel, these stations feature manual rewind and are equipped with booster hose and a handline nozzle.

Taking advantage of water power

The CHEMGUARD Water-Powered Oscillating Monitor Station is a self-contained unit that only relies on water flow and pressure for the system to operate. Filling the foam concentrate storage tank with the correct type and quantity of foam concentrate and connecting a suitable water source to the inlet places the unit in operation.

Self-contained foam proportioning

The CHEMGUARD Bladder Tank/Foam Station is a self-contained foam proportioning system that requires no external power other than suitable water supply to place the unit in operation. Compact in size, bladder tanks and foam stations are ideal for supplying foam solution to various handline nozzles. Other design applications include small fixed systems protecting flammable liquid storage areas.

APPLICATIONS FOR PREASSEMBLED FIREFIGHTING STATIONS

- Aircraft hangars
- Chemical processing plants
- Heliports
- Marinas
- Natural gas industries
- Off-shore platforms
- Petroleum and petrochemical industries
- Truck loading racks

The final authority in fire protection

A global leader in foam fire protection solutions, CHEMGUARD offers engineering and design expertise, quality manufacturing and unmatched customer support. CHEMGUARD foam agents and hardware can meet your fire suppression needs for a broad range of applications.

A Passion for Protection

Dedicated customer support. Extensive product portfolio. Engineering excellence. Trusted, proven brands. Tyco Fire Protection Products offers all of these attributes, plus a passion for protection. It's what drives us to create solutions to help safeguard what matters most — your valued people, property and business.
